

# Acronis Snap Deploy

All-in-one deployment solution

Acronis Snap Deploy is an all-in-one deployment solution, enabling you to provision hundreds of systems as fast as you can provision one. It lets you:

**Manage deployments with ease:** Acronis Snap Deploy is ideal for rapid bare-metal initial deployment and effortless ongoing redeployment to existing live machines.

**Increase operational efficiency:** Save time and effort with automated provisioning of new operating systems and software to hundreds of systems simultaneously – quickly and reliably.

**Provide complete, consistent, and secure environments:** Reduce configuration errors and ensure your environments are safe, malware-free, and up-to-date.
