

## Product features

- Keepit will automatically backup all your data across your Office 365 Apps:
  - Mailboxes (all types)
  - In-Place Archives
  - Calendar – Tasks – Contacts
  - SharePoint Sites (incl. lists and permissions)
  - OneDrive
  - Groups (conversations, plans, files, sites, calendar)
  - Teams (including chat and wiki)
- Keepit also allows for cross-user restoration of data from one user to another as well as from one Office 365 account to another. Office data can be restored to a folder or a .PST-file enabling the user to quickly select the needed data to recover.
- SharePoint sites can be restored to a different site enabling easy clean up or consolidation of files
- Retention period for backup data is 12 months as default but can be extended indefinitely. You have the option to set specific retention by data type.
- Tier 3 data centers with private cloud. 256 bit TLS encryption for data transmission – Blockchain for storage
- Tech info : [help.keepit.com/support/solutions/6000139060](https://help.keepit.com/support/solutions/6000139060)

## Coverage

### Exchange
